

Euro PhD Summer School 2025 to Kick Off at the University of Lleida

The highly anticipated Euro PhD Summer School 2025 will commence on **June 26, running till 4th July 2025**, at the University of Lleida in Spain. The program devoted to "Optimization and AI in Agriculture" brings together doctoral students, researchers, and academics from across Europe and Latin America to exchange knowledge and engage in collaborative learning.

With a focus on interdisciplinary research and innovation, the summer school will feature workshops, keynote lectures, and networking opportunities led by renowned experts in various fields. Participants will have the chance to enhance their academic skills and build professional connections in the vibrant setting of Lleida, a city known for its rich cultural heritage and dynamic academic environment.

The event runs through early July (4th July), offering a packed agenda tailored to foster academic excellence and international collaboration. In addition it is also overlaped with ELAVIO 2025, the Latin American Summer School in OR sponsored by ALIO, the Latin American OR Association.

The Euro PhD Summer School 2025 begins on **June 26** at the University of Lleida, bringing together researchers and students for workshops, lectures, and networking. The program fosters interdisciplinary learning and international collaboration in a vibrant academic setting.
